## **DETAILED ACTION**

### ***Election/Restrictions***

No further arguments are present by the Applicant with regards to the restriction requirement. The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-13, 15-17, and 19-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a judicial exception, an abstract idea; as such, pursuant to the Interim Guidelines on Patent Eligible Subject Matter (MPEP 2106)), the claims must have either physical transformation and/or a useful, concrete and tangible result. The claims fail to include transformation from one physical state to another. Although, the claims appear useful and concrete, a tangible result is not claimed. Merely determining a distortion error is not sufficient to constitute a tangible result, since the outcome of the determining step has not been used in a disclosed practical application nor made available in such a manner that its usefulness in a disclosed practical application can be realized. As such, the subject matter of the claims is not patent eligible.

***Response to Arguments***

2. Applicant's arguments filed 1/29/07 have been fully considered but they are not persuasive.

With regards to Applicant's arguments regarding the rejection under 35 U.S.C. 101, the Examiner agrees that the present invention is a process, however the Examiner respectfully disagrees with the Applicant's assertion that claims 10-13, 15-17, and 19-20 is not an abstract idea. The claimed process does not have a physical transformation.

With respect to Applicant's argument regarding tangibility, the arguments do not support how the result is tangible, except to merely allege that the result is tangible. In order for the result to be tangible, the outcome of the determining step has to be used in a disclosed practical application or made available in such a manner that its usefulness in a disclosed practical application can be realized. None of the present claims recite the determined error being used in a practical application nor made available.

***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2886

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
